

Installing BMW Scanner device drivers

To install drivers for an BMW Scanner device under Windows 98, follow the instructions below:

Connect the device to a spare USB port on your PC. This will launch the Windows Add New Hardware Wizard. Windows may display a message reading "Building driver database" at this point which may take a few minutes to pass. Click "Next" to proceed with the installation.

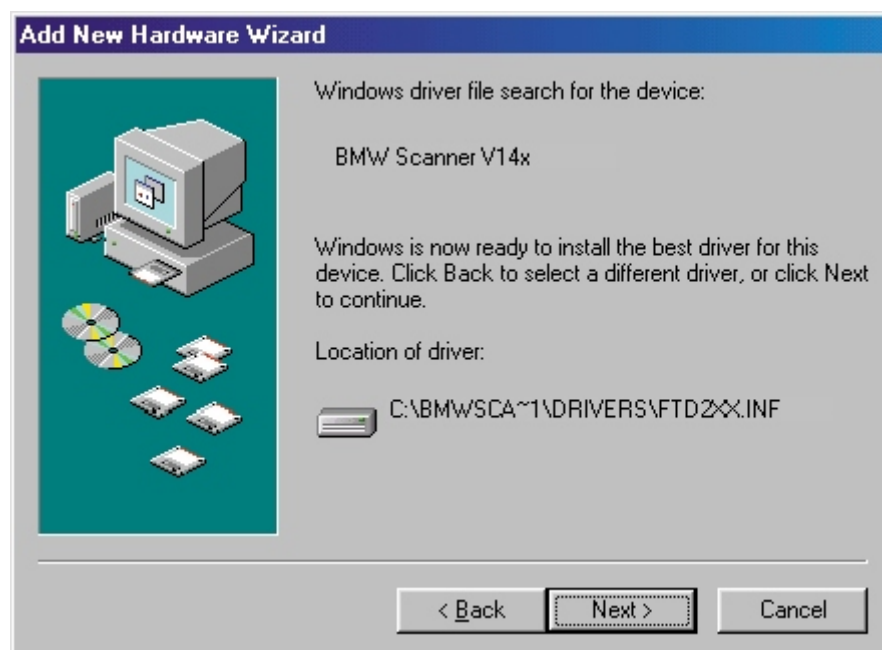

Select "Search for the best driver for your device. (Recommended)." as shown below and then click "Next".

Check the box next to "Specify a location" and uncheck all others as shown below. Click "Browse" and locate the driver files. Once the files have been located, click "Next" to proceed with the installation.

Windows may display a message reading "Building driver database" at this point which may take a few minutes to pass. Once Windows has found the required files, click "Next" to install the device.

Windows should then display a message indicating that the installation was successful. Click "Finish" to complete the installation. The device is now ready for use.

Open the Device Manager (located in "Control Panel\System" then select the ""Device Manger" tab) and select "View devices by type". The device appears as a BMW Scanner V14x connected to a USB port.
